1089 West Morse Boulevard
Winter Park, Florida 32789

Dear Ms. Wainman,

On behalf of the Central Florida Chapter of the Florida Association of Play Therapy, I would like to thank you for your presentation on sensory integration disorder and treatment. Our members found it invaluable to visit your facility, learn more about sensory integration issues, and hear how we as mental health professionals can identify and assist our clients with these issues. Some comments I received about your presentation include:

"Thank you for your hospitality, as well as the invaluable information you provided us. I will certainly be able to provide better information and direction to parents of children who need SI interventions." Sally Crumly

"I am working in the field of elementary education (with first and second grade ESE students) while pursuing my master's in mental health counseling at Rollins. The brief but in-depth information that you shared with us will assist me in my current work with students and in my future practice as a play therapist. I am also vitally interested in your research with the pre-kindergarten students, since I am absolutely convinced that the earlier a child has a corrective experience, the better the quality of the child's life. Please keep me informed about the results. Again, many thanks for your informative presentation to our play therapy chapter." Pam Ford

Your presentation was engaging, informative, and very responsive to our questions. We also appreciate the handouts and snacks! Thank you again for your time and the useful information.

Sincerely,

Jill K. Davis, LCSW, RPT
Secretary/Treasurer
